HISTORY AND HERITAGE

AEG has a very rich brand history and heritage which we are all very proud of. AEG has been deeply routed in the forefront of precise design and performance within the electrical field for over 100 years.

Style is never an accident. A hundred years ago, AEG was the first electrical company to hire an industrial designer. Peter Behrens, the father of the Bauhaus design movement and was the world's first recognized industrial designer.

Good design doesn't just make things easy for the eye, but easier for you to use.

Perfekt in form und funktion is more than a slogan ... It is a philosophy.

perfekt in form und funktion

RETRO-LINE

TIMELESS DESIGN & QUALITY

Inspired by the past, the AEG telephones Retro-line combines a timeless design with high quality features. Industrial designs of the 1960's and 70's were reinvented and moulded into exiting telephone designs.

These cordless and corded phones form a classic but un-conventional shape, while their technical features answer everyone's communication needs.

The Retro-line perfectly balances stylish designs, high quality features and simplicity of use, setting a new standard in today's world of home or business communication.

S-LINE

SPECIAL PHONES FOR EASY COMMUNICATION

In today's world of communication and high technology products, you would almost forget that telephones were essentially created for making telephone calls.

The S-line Mobiles and Fixed Line phones include extra big buttons, large displays and amplified sound to increase functionality.

These easy-to-use telephones are hearing aid compatible and adapt to the needs of people with sight- or hearing problems and the elderly so that everyone can enjoy the freedom of communication.

DETAILS THAT MAKE THE DIFFERENCE

DESIGN
Elegant forms and ergonomic design.

USABILITY
Easy grip coating with soft touch texture, User-friendly interface, scroll key for easy-control. All AEG mobiles include a desktop cradle for easy charging and are Simlock Free.

VISION
Large & well spaced buttons, clear display text & high contrast.

AUDIO
Natural sound and boosted volumes, compatible with hearing aid devices.

SAFETY
SOS-help key. When pressed, a very loud alarm tone will alert people in the area to help and an SMS will be sent to 5 programmed numbers to alert friends or family. Seconds later, the phone will automatically ring these numbers and switch to handsfree so that you can speak to the person who answers your SOS call.

S-LINE

SPECIAL PHONES FOR EASY COMMUNICATION

In today's world of communication and high technology products, you would almost forget that telephones were essentially created for making telephone calls.

The S-line Mobiles and Fixed Line phones include extra big buttons, large displays and amplified sound to increase functionality.

These easy-to-use telephones are hearing aid compatible and adapt to the needs of people with sight- or hearing problems and the elderly so that everyone can enjoy the freedom of communication.

DETAILS THAT MAKE THE DIFFERENCE

DESIGN
Elegant forms and ergonomic design.

USABILITY
Easy grip coating with soft touch texture, User-friendly interface, scroll key for easy-control. All AEG mobiles include a desktop cradle for easy charging and are Simlock Free.

VISION
Large & well spaced buttons, clear display text & high contrast.

AUDIO
Natural sound and boosted volumes, compatible with hearing aid devices.

SAFETY
SOS-help key. When pressed, a very loud alarm tone will alert people in the area to help and an SMS will be sent to 5 programmed numbers to alert friends or family. Seconds later, the phone will automatically ring these numbers and switch to handsfree so that you can speak to the person who answers your SOS call.
